Main

As a highly motivated front-end developer, I am committed to writing clean, efficient, and maintainable code that adheres to the DRY and KISS principles.

I believe in the power of simplicity and elegance in design, and strive to create user interfaces that are intuitive, accessible, and responsive across all devices and platforms.

I place a strong emphasis on semantic correctness, ensuring that my code is structured in a logical and meaningful way that makes it easy to understand and navigate for both humans and machines.

With a strong foundation in HTML, CSS, and JavaScript, I am eager to expand my skillset and contribute to innovative projects that push the boundaries of what's possible on the web.

Education

- HTML Academy - HTML & CSS.
Professional website coding.
- HTML Academy - HTML & CSS.
Adaptive website coding and automation.
- HTML Academy - React.
Development of complex client applications.
